Bauerfeind AG is one of the world’s leading manufacturers of medical aids. With our products and health care concepts, we enable people to get moving and thus play an important role in helping them stay healthy.

We have been developing compression products for phlebological and lymphatic conditions for decades, approaching our production and service with untiring dedication and our development with ingenuity.

Thanks to our custom-made VenoTrain curaflow flat knit products, we can offer our lymphatic patients perfectly tailored solutions, with six different colors to choose from (cream, caramel, anthracite, black, navy, and bordeaux) and more than 1,000 different ways of combining products and additional features. The beneficial therapeutic features of the range include the knit’s high microfiber content, the flat sensitive stitching, and special comfort zones such as the extra-soft area behind the knee.

The flat-knit compression stocking VenoTrain delight is indicated for use with advanced venous disorders and 1st stage lymphedema. The breathable double-stretch knit is latex-free, skin-friendly, and easy to put on and take off. The reduced compression of the gripRelief structure on all supportive bands prevents unpleasant constriction.

Our circular knit VenoTrain impuls compression stocking combines a wide range of benefits: Its breathable microfiber and firm compression thread offers unique wearing comfort with a strong effect. Only very little movement is needed for the stocking to exert the required therapeutic pressure.

A RELIABLE COMBINATION ACCORDING TO USERS*

90% COMFORTABLE!
THE MATERIAL
90 percent of users rated the VenoTrain curaflow material as good or excellent.

91% WELL-FITTING!
THE FIT
91 percent of those surveyed felt that their VenoTrain curaflow compression stockings fitted well or very well.

82% CONVENIENT!
PUTTING ON THE PRODUCT
82 percent of users also found their VenoTrain curaflow products easy or very easy to put on.

* Source: Results from a patient survey assessing treatment with VenoTrain curaflow compression products, Bauerfeind AG – March to August 2014
DESIGNED FOR EVERYDAY LIFE

Smooth microfibers make the stockings convenient to put on and comfortable to wear.

Constant pressure and an ideal pressure profile with a tangible effect throughout the time worn, pleasantly soft, fine double-stretch knit.

Perfect fit for individual body dimensions thanks to anatomically tailored stitched products.

Breathable and moisture-regulating knit for excellent wearing comfort.

VenoTrain curaflow
ADDITIONAL FEATURES

Extra-soft behind the knee for problem-free mobility.

Intelligent longitudinal structure for optimal lymph transportation.
Our VenoTrain compression stockings cover all areas of application associated with modern compression therapy. They offer impressive, clinically proven effectiveness and unique material properties. Thanks to the wide range of colors available, the compression products blend seamlessly into their users’ everyday lives and can be combined with various fashion styles.

As a preventive measure prior to treatment of lymphedema: The solutions, which are tailored to specific indications, include a wide variety of circular and flat knit styles that are available as custom-made or standard products.

All VenoTrain products conform to the requirements of the German Medical Devices Act (MPG) and bear the RAL quality mark. As a seal of quality, the Standard 100 by Oeko-Tex® guarantees testing for harmful substances.
It is important to regularly train the correct measurement of flat knit products in order to ensure the best possible care for patients.

In cooperation with your local representative, Bauerfeind Academy offers individualized training sessions on lymphology.

Please contact your local organisation for further details.

**LYMPHOLOGY TRAINING CONTENTS:**

- Medical basics of lymphology and compression therapy
- Complex physical decongestive therapy
- Indication-based treatment with Bauerfeind flat knit products
- Practical measurement and fitting of flat knit products on the leg, arm, hand and thorax including additional features such as toe caps, pads, etc.
- Practical work involving direct patient contact (measuring and fitting)
CARE SYSTEM
LEGG & FOOT

STAGES OF LYMPHEDEMA & LIPEDEMA

Stage 0
LATENCY STAGE
The lymphatic system is damaged, but there are still no visible or palpable edemas.

Stage 1
SPONTANEOUSLY REVERSIBLE STAGE
The tissue is soft and can be pressed down gently with a visible indentation. The lymphedema subsides when the leg or arm is elevated.

Stage 2
SPONTANEOUSLY IRREVERSIBLE STAGE
The tissue is hardened and it is either difficult or impossible to press down on it and create an indentation. There may be pain and restriction of movement.

Stage 3
ELEPHANTIASIS STAGE
A significant increase in edema size, sometimes with extreme dimensions. The tissue is also tougher and harder. There are also lobes of fat causing extensive deformation.

PRODUCT RECOMMENDATION

VenoTrain impuls stages 0–1

VenoTrain delight stages 0–2

VenoTrain curaflow stages 0–3

VenoTrain impuls COMPRESSION CCL 2–3
- Soft microfiber, smooth and breathable
- Short-stretch elastic
- Circular knit

VenoTrain delight COMPRESSION CCL 2–4
- Latex-free and gentle on the skin
- Hard-wearing
- Extra-flat seams, flat knit

VenoTrain curaflow COMPRESSION CCL 1–4
- Soft microfiber, smooth and breathable
- Extra-flat seams, flat knit

COMPRESSION CLASSES

CCL 1: 18–21 MMHG
- Light compression
- Light surface effect
- Treatment of childhood lymphedema, edema caused by inactivity

CCL 2: 23–32 MMHG
- Moderate compression
- Moderate surface effect
- Light deep-vein effect
- Treatment of primary and secondary lymphedema of the arm and leg (stages 1 and 2), lipedema, lipolymphedema

CCL 3: 34–46 MMHG
- Firm compression
- Surface and deep-vein effect
- Treatment of primary and secondary lymphedema of the arm and leg (stages 2 and 3), lipedema, lipolymphedema

CCL 4: FROM 49 MMHG
- Extra-firm compression
- Strong deep-vein effect
- Treatment of primary and secondary lymphedema of the leg (stages 2 and 3), lipedema, lipolymphedema
VenoTrain® impuls
FOR ADVANCED VEIN PROBLEMS

 Produces a particularly deep action by exerting high working pressure with even the slightest muscle movements. Easy to put on and breathable thanks to microfibers.

 Highly effective for advanced vein problems, post-thrombotic syndrome, follow-up care for healed ulcers, and therapy in the early stages of lymphedema.

FEATURES

- The short-stretch knit produces a high working pressure with even the slightest muscle movements
- Easy to put on thanks to microfiber material
- Skin-friendly microfiber material makes the product breathable and ensures climate regulation
- Highly differentiated V6+ (I–VI) sizing system

**ADDITIONAL FEATURES FOR LEG & FOOT**

---

**01 FOOT WITH DIAGONAL CUT**

**PATIENT’S SITUATION**
- Edematous dorsum of the foot
- Toe misalignments
- Skin and nail conditions in the toe area

**EFFECT**
- Required pressure profile at the metatarsophalangeal joints
- Anatomical fit

---

**02 FOOT STRAIGHT AND OPEN**

**PATIENT’S SITUATION**
- Edematous dorsum of the foot
- Toe and foot misalignments
- Narrow foot tapering toward the heel

**EFFECT**
- Prevention of foot and/or heel slipping backward
- Very well tolerated soft toe

---

**03 T-HEEL**

**PATIENT’S SITUATION**
- Skin folds at Y
- Pronounced anatomical heel

**EFFECT**
- No creasing at the heel or instep
- Improved therapeutic gradient in the ankle region
- Better joint functionality
04  
**SILICONE DOTTED BAND**

**PATIENT’S SITUATION**
- Generally required on all compression stockings for fastening in place

**EFFECT**
- Holds the compression stocking in place
- User-friendly

05  
**PAD**

**PATIENT’S SITUATION**
- Edema and hardening in the ankle region

**EFFECT**
- Increase in pressure at specific points
- Prevention of edemas and hardening
The high microfiber content and the innovative way these are processed make this item unique. Extra-flat sensitive stitching and special comfort zones ensure this flat knit product provides excellent wearing comfort.

**FEATURES**

- Smooth microfibers make the product convenient to put on
- Skin-friendly microfiber material makes the product breathable and ensures climate regulation
- Extra-soft toe
- Anatomical, extra-soft area behind the knee for unrestricted freedom of movement
- Custom-made solutions to suit individual requirements

Thanks to the custom-made solutions available, VenoTrain curaflow products can be individually adapted to suit each wearer’s requirements. The product features shown here are the most popular additional options. Our extensive range of custom-made solutions offers a total of over 1,000 possible product combinations. Please refer to our current price list for more additional features.

**01 FOOT CLOSED AT AN ANGLE**
**PATIENT’S SITUATION**
- Edematous dorsum of the foot
- Toe and foot misalignments
- Narrow foot tapering toward the heel
**EFFECT**
- Required pressure profile at the metatarsophalangeal joints
- Anatomical fit
- Prevention of foot/heel slipping backward
- Very well tolerated soft toe

**02 FOOT STRAIGHT AND OPEN**
**PATIENT’S SITUATION**
- Edematous dorsum of the foot with a relatively straight toe line
- Foot not tapered
**EFFECT**
- Prevention of foot/heel slipping backward
- Very well tolerated soft toe

**03 FOOT WITH DIAGONAL CUT**
**PATIENT’S SITUATION**
- Edematous dorsum of the foot
- Toe misalignments
- Skin and nail conditions in the toe area
**EFFECT**
- Required pressure profile at the metatarsophalangeal joints
- Anatomical fit

**04 90° HEEL**
**PATIENT’S SITUATION**
- Skin folds at Y
- Pronounced anatomical heel
- Wheelchair user
**EFFECT**
- No creasing at the heel or instep
- Improved therapeutic gradient in the ankle region
- Better joint functionality

**05 INSTEP WIDENING**
**PATIENT’S SITUATION**
- Bulges at Y
- Lymphedema (end of stage 2/beginning of stage 3)
**EFFECT**
- Reduced pressure on the dorsiflexor tendon
- Improved therapeutic gradient on the dorsum of the foot

**06 HALLUX**
**PATIENT’S SITUATION**
- Bunion (hallux valgus)
**EFFECT**
- Optimum fit in the region of the big toe
- Pressure relief
07 KNEE ZONE (STANDARD FEATURE ON ALL LEG PRODUCTS WITH A KNEE)
PATIENT’S SITUATION
- Generally for lymph and lipedema patients
EFFECT
- Extra-soft behind the knee to reduce creasing
- Anatomical fit for better joint functionality

08 SLANTED EDGING
PATIENT’S SITUATION
- Generally for lymph and lipedema patients
- Tapered anatomical shape
- Soft skin tissue
EFFECT
- Improved therapeutic gradient at the ends of the stockings (AD and AG possible)
- Anatomical fit

09 SILICONE DOTTED BAND
PATIENT’S SITUATION
- Generally required on all compression stockings for fastening in place
EFFECT
- Holds the compression stocking in place

10 STRIPED SILICONE TOP BAND
PATIENT’S SITUATION
- Offers a stronger hold; suitable for firmer edemas and large leg circumferences
EFFECT
- Holds the compression stocking in place

11 SILICONE TOP BAND SECTION
PATIENT’S SITUATION
- Pronounced tapered leg shape
- Very soft tissue
EFFECT
- Extra grip
12 GARTER BELT
PATIENT’S SITUATION
- Cannot tolerate silicone top band
EFFECT
- Holds the compression stocking in place

13 ZIP FASTENING
PATIENT’S SITUATION
- Secondary conditions such as rheumatism, arthritis, incontinence, etc.
EFFECT
- Makes it easier to put on and take off the product so that it fits correctly

14 ATU GUSSET
PATIENT’S SITUATION
- Pregnancy
EFFECT
- Improved fit in the panty area
- Reduced compression in the abdominal region

15 STANDARD MEN’S GUSSET
PATIENT’S SITUATION
- Pantyhose for men
EFFECT
- Improved fit in the panty area

16 LOOPED/PULL-THROUGH ELASTIC BAND (STANDARD)
PATIENT’S SITUATION
- Fluctuating waist circumference
- Pregnancy
- Asthmatic
EFFECT
- Adjustable width in the waist area
- Adapts to changing body shape

17 WAIST BAND
PATIENT’S SITUATION
- For all pantyhose products
EFFECT
- Perfect fit without being bulky

18 INTEGRATED PAD
PATIENT’S SITUATION
- Edema and hardening in the ankle region
EFFECT
- Increase in pressure at specific points
- Prevention of edemas and hardening

19 INTEGRATED LYMPH PAD
PATIENT’S SITUATION
- Locally aggravated edema or hardening
- Variations from standard anatomical shape
EFFECT
- Increase in pressure at specific points
- Prevention of edemas and hardening

20 TOE CAP
PATIENT’S SITUATION
- Forefoot and toe lymphedema
- Edema of the dorsum of the foot
EFFECT
- Prevention of edema in the forefoot and toe area

21 SEWN-ON TOE LOOPS
PATIENT’S SITUATION
- Forefoot and toe lymphedema
- Edema of the dorsum of the foot
EFFECT
- Prevention of edema in the forefoot and toe area
- No overlapping of the stocking and toe section

∙ Prevention of edemas in fingers and on the back of the hand
VenoTrain® curaflow
FOR TREATING LYMPHEDEMA AND LIPEDEMA
THORAX

Lymph relief bras are generally insufficient for treating breast and chest wall edemas and individual solutions are often required. In these cases, thorax compression therapy with the VenoTrain curaflow Body can be the key to a better quality of life.

The seam-free chest area fits snugly and comfortably against the chest and exerts even compression on the lymphedema without causing any constriction or rubbing.

FEATURES
- Smooth microfibers make the product convenient to put on
- Skin-friendly microfiber material makes the product breathable and ensures climate regulation

EFFECT
- Makes it easier to put on and take off the product so that it fits correctly
VenoTrain® ACCESSORIES
THE PERFECT ADDITION FOR EVERYDAY USE

The handy extras from the VenoTrain accessories range are useful for ensuring that patients feel comfortable using and wearing their VenoTrain compression stockings. They provide effective support for treatment, make it easier to handle the products, and care for the compression stockings as well as your customers’ skin.

01 Rubber gloves help with putting the compression stockings on correctly

02 Measurement bag for assistance when carrying out measurements

03 Starter kit including gloves, a foot file, lingerie bag, non-skid soles, an exercise band, and a loyalty card

04 Washing bag to protect the compression stockings during every machine wash

05 VenoTrain® lotion developed in collaboration with Sebapharma; contains chamomile extract and is specially designed for people with sensitive skin

06 Bauerfeind care foam contains panthenol to protect and soothe particularly stressed and sensitive skin

07 Special detergent cleans gently, ensuring careful treatment of your products, and providing lasting protection
The VenoTrain glider is a practical aid for putting on and taking off medical compression stockings. It can be prescribed by a physician.

The lightweight, hard-wearing material makes the stocking glide effortlessly over the arm or leg. It is suitable for compression stockings with an open or closed toe.

Saving space and time, it is the ideal companion when you’re out and about.

**FEATURES**
- Extremely lightweight, robust, and tear-resistant
- Easy to handle
- Ideal for travel

BAUERFEIND AG
TERMS AND CONDITIONS OF SALE AND DELIVERY (GTC)
VERSION: FEBRUARY 2016

Prices are quoted as net prices in euros ex works and do not include statutory VAT.

Shipping is at the risk and on the account of the purchaser, even if the purchaser does not bear the costs of transportation. Disruptions of operations affecting us or any of our suppliers, lack of suitable personnel, strike, lockout, and force majeure are causes for extending delivery and relieve us of any delivery obligation for the duration of the obstruction.

Shipping costs are calculated as a flat rate of EUR 7 for a net total order value of up to EUR 50, and EUR 4 for a net total order value of up to EUR 200. No shipping costs are payable for custom-made solutions. Special shipping requests are calculated on a time and material basis.

Returns are only accepted outside the warranty terms if we have been notified in advance and approved the return (notification) with inclusion of the shipping documents and under the assumption that the returned goods are in faultless condition. We reserve the right to reject any returned consignment. Except where covered by warranty, we charge for processing returns. For returns within one month of the date of this charge, this charge is EUR 10.00 for each return consignment. For goods returned one month or more after the date of delivery, a handling fee of 20 percent of the net order value, or a maximum of EUR 25.00 per product and unit, is charged; for returns six to 12 months after the delivery date, the fee is 40 percent of the net order value, or a maximum fee of EUR 50.00 per each product and unit. Except where covered by warranty, no returns, including without limitation for custom-made orders, will be accepted after 12 months following the date of delivery.

Payments are due immediately following delivery. We offer a four percent discount for payments made by direct debit and a three percent discount for payments made within 10 days of the invoice date. Otherwise payment is 30 days net. The buyer shall be considered in arrears once the 30 days from the invoice date have passed. From this point on, any further deliveries will only be made against advance payment. From the date that the customer is in arrears, we will charge default interest of eight percent above the applicable base interest rate. Payments by check, draft, etc. are deemed to be made only when the amount has been credited fully and irrevocably to our account.

Retention of proprietary rights
We retain the proprietary rights to all of the delivered goods until the purchaser has settled all of the outstanding amounts due to us as a result of the business relationship. The retention of proprietary rights shall also apply pro rata if the product in question has been processed or modified. If the goods are resold, all third-party claims arising therefrom up to the total amount owed to us shall be transferred to us without proviso. Notwithstanding the assignment, the buyer is entitled to the collection of these amounts. Our right to collect the amounts is not affected by the preceding provision; however, we undertake to refrain from collection unless the buyer defaults on payment. If the buyer defaults on payment, we can demand that the buyer discloses the assigned claims and the names of the debtors, provides all information required for collection of the debt, delivers all required documents, and informs the debtors (third parties) of the assignment. The buyer shall not be entitled to pledge or assign the goods as security. Pledges, confiscation, or any other dispositions taken by a third party shall be promptly communicated to us by the buyer and all information and documents necessary for us to defend our rights shall be provided. We undertake to release the security due to us at the seller's request to the extent that its value does not exceed that of the claim to be secured by more than 28 percent and provided the claim in question has not yet been settled.

Complaints
Warranty claims in respect of obvious defects shall be void if we do not receive immediate written notification of these claims in accordance with Section 377 of the German Commercial Code (HGB). In all other cases, the warranty period for warranty claims is one year after delivery of the purchased goods. If the goods are defective, we may replace or repair the goods at our discretion. For reasons of hygiene, repairs can only be made to goods that have been washed or which are in perfect sanitary condition. Upon receipt of unwashed goods, we reserve the right to claim a suitable sum for additional work. Provided that we fulfill our supplementary performance obligations, especially in regard to rectifying defects or delivering a defect-free product, the customer has no right to demand a price reduction or to withdraw from the contract, unless we fail to deliver our supplementary performance. Defects which are due to normal wear and tear, overuse, misuse, neglect of care, or non-compliance with the instructions for use are not covered by warranty.

Liability
For damages is excluded unless there has been grossly negligent or willful misconduct on our part or on the part of our representatives or agents. This limitation of liability does not apply to damage due to injury of life, body, or health or the violation of a material contractual duty.

Place of Jurisdiction
The place of performance for the delivery is the registered office of our company. The place of jurisdiction for all disputes arising from the business relationship is Gera, Germany.

Severability clause
In the event that any individual provision of these terms and conditions of sale and delivery is or becomes invalid, the validity of the remaining provisions shall remain unaffected. The invalid provision shall be replaced with a valid provision which reflects the original economic intention of the parties as closely as possible.
BETTER QUALITY OF LIFE FOR YOUR CUSTOMERS!
