"Rich Olive is inspired by the colors of Tuscany. It reflects the goodness of olive oil. This shade is both a trend color and timelessly current. Plus, it can easily be combined with other shades, making it a true all-rounder when it comes to creating new stylish outfits."

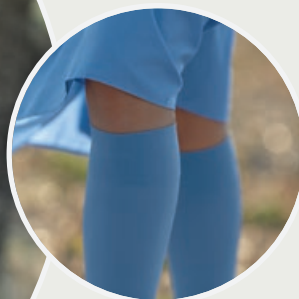

FEEL

Simply feel good: be carefree, independent, and beautiful with the many exciting colors and styles the VenoTrain micro is offering.

ENERGIZING STYLE.

Not only does it dazzle with its sheer elegance, its noticeably pleasant touch also makes you want to get up and be active. The VenoTrain micro is the perfect compression stocking for anyone who likes to be on the move and wants to enjoy an active lifestyle. Quite simply, it makes you want to live life to the fullest!

A slim waist, flat stomach, firm-looking buttocks – the VenoTrain micro offers body-shaping with style.

Our model is wearing the VenoTrain micro in the Fashion Color Rich Olive in the »Jive« Design Edition as well as the knee-high stocking in Mystic Blue.

Good to know:

Wearing compression stockings, like our VenoTrain micro, are often recommended with pregnancy. Compression stockings will keep your veins in shape and help with venous blood flow in the legs. Water retention is avoided and swelling reduced. So you can continue to relax during your pregnancy!

"Mystic Blue is inspired by the depth of the ocean and the splendor of the clouds reflecting in it. It's a shade of blue that encourages you to keep combining it. Its gentle shimmer puts a spotlight on every leg, showing off its best features."

VenoTrain micro will make your legs look even more beautiful. Thanks to its smooth knitted fabric, it is exceptionally soft and skin-friendly, and it stimulates blood circulation, relieves your veins and creates an attractive silhouette. It comes as no surprise that this is our most popular compression stocking.

Goodbye boredom: 11 colors are waiting for you. Whether as a uni-colored stocking, in Batik or the Design Edition – our VenoTrain micro is ready for any occasion.

Our model is wearing the VenoTrain micro in the Fashion Color Wild Berry in the »Jive« Design Edition as well as the knee-high stocking in the Fashion Color Rich Olive Batik black.

THE PERFECT BUSINESS PLAN.

Long hours spent in the office, in the car or on a plane put a lot of strain on your legs. Sitting or standing for long periods of time restricts venous blood flow, causing your legs to become heavy and swollen. There is a solution: The choice is yours!

Compression stockings provide relief and stimulate venous blood flow in your legs, even when you spend a lot of time sitting.

WITH

Studies have shown that prolonged seated immobility at work represents a risk factor for developing venous thromboembolism (VTE).*

2-IN-1 EFFECT: MEDICAL COMPRESSION PLUS SKIN REPAIR.

The VenoTrain cocoon consists of a blend of natural fibers with an innovative cocoon care thread. This thread contains special lipid depots with high-quality care substances, which are continuously applied to the skin when the stocking is worn.

The clinically tested lipid care complex works directly on the outermost layer of the skin – the stratum corneum. It supports lasting, natural skin regeneration. Itchiness and flaky skin are effectively prevented. A clinical study showed that wearing the VenoTrain cocoon retained significantly more skin moisture particularly in patients with low skin humidity, and male patients when compared to wearing a common compression stocking.* Compression and genuine skincare: the combination that makes the VenoTrain cocoon unique.

Before

After

The VenoTrain cocoon is perfume-free and tested in accordance with OEKO-TEX STANDARD 100 as a guarantee of its safety.

“The unique material mix in combination with an active skincare substance is a completely new concept!”

Gerti Stegmann
Product developer
Bauerfeind
Innovation Center

SKIN COMPATIBILITY CLINICALLY TESTED

The integrated cocoon care fibers are made from cellulose, cotton and a lipid skincare complex. This innovative mix of natural fibers contains special lipid depots with precious care substances. These are continuously applied to the skin when the stocking is being worn.
